

# NQF 4: INVENTORY CONTROL

SAQA Registered Qualification ID 83987

Further Education & Training Certificate: Generic Management: Inventory & Inventory Control

Detailed fact sheet available  
on request

## LEARNERSHIP

## Overview

This learnership introduces the foundational competencies of planning, organising, controlling and leading. Learners will gain understanding of performance measures in the supply chain, the budgeting process, cost control methodologies and problem solving techniques. With this as a foundation, learners will be equipped with the knowledge and skills necessary to control inventory in such a way that operational efficiencies and customer service levels are balanced and optimised.

## Participant Profile

Supervisors in the supply chain who have an impact on the control of inventory and influence on inventory replenishment.

## Duration

Learners spend a total of 33 days in the classroom over a period of 12 months.

## Modules

1. Calculations at Work
2. Communication at Work
3. Planning, Organising, Controlling and Leading
4. Performance Measures in the Supply Chain
5. Budgets and Cost Control
6. Problem Solving
7. Principles of Team Behaviour
8. Principles of Inventory Control

## Learning & Assessment

Learners practice the skills used in the inventory control process including ABC analysis, cycle counting, inventory valuation and re-order decision making. They are provided with tools and templates relating to setting objectives, planning and organising resources, problem solving and decision making.
